| Immunogen                | Human full length recombinant cyclin D1 protein                                                                                                                                                                                                               |
| Produktbeschreibung      | Recognizes a protein of 36kDa, identified as cyclin D1. Cyclin D1, one of the key cell cycle regulators, is a putative proto-oncogene overexpressed in a wide variety of human neoplasms. This antibody neutralizes the activity of cyclin D1 in vivo. Abo... |
