| Spezies Reaktivität      | Human, Mouse, Rat                                                                                                                                                                                                                                             |
| Immunogen                | A 17-amino acid synthetic peptide from the carboxyl-terminus of rat TGF-alpha.                                                                                                                                                                                |
| Produktbeschreibung      | This antibody reacts with the C-terminus of TGF-alphaalpha and shows no cross-reaction with EGF and the neuropeptide synenkephalin. The staining with Ab-1 is completely blocked by the peptide used for raising this antibody. TGF-alpha(aa50) is a growt... |
| Klonalität               | Monoclonal                                                                                                                                                                                                                                                    |
| Klon-Bezeichnung         | [SPM357]                                                                                                                                                                                                                                                      |
| NCBI                     | <a href="#">7039</a>                                                                                                                                                                                                                                          |

|                        |                                                                      |
