| Immunogen                | Human thymocytes                                                                                                                                                                                                                                              |
| Produktbeschreibung      | At least five CD1 genes (CD1a, b, c, d, and e) are identified. CD1 proteins have been demonstrated to restrict T cell response to non-peptide lipid and glycolipid antigens and play a role in non-classical antigen presentation. CD1a is a non-polymorph... |
| Klonalität               | Monoclonal                                                                                                                                                                                                                                                    |
