| Spezies Reaktivität      | Human                                                                                                                                                                                                                                                         |
| Immunogen                | Recombinant fragment of human CD5 protein (around aa 269-366) (exact sequence is proprietary)                                                                                                                                                                 |
| Produktbeschreibung      | Recognizes a 67kDa transmembrane protein, which is identified as CD5. The CD5 antigen is found on 95% of thymocytes and 72% of peripheral blood lymphocytes. In lymph nodes, the main reactivity is observed in T cell areas. Anti-CD5 is a pan T-cell mar... |
| Klonalität               | Monoclonal                                                                                                                                                                                                                                                    |
| Klon-Bezeichnung         | [CD5/2416]                                                                                                                                                                                                                                                    |
| NCBI                     | <a href="#">921</a>                                                                                                                                                                                                                                           |

|                        |                                                                                                                                                                                                                                                                  |
