| Immunogen                | SU-DHL-1 large cell lymphoma cells                                                                                                                                                                                                                            |
| Konjugation              | CF647                                                                                                                                                                                                                                                         |
| Produktbeschreibung      | This MAb recognizes an antigen associated with the Golgi complex in human cells only. It can be used to stain the Golgi complex in cell or tissue preparations and can be used as a Golgi marker in subcellular fractions. It produces a diffuse staining ... |
| Klonalität               | Monoclonal                                                                                                                                                                                                                                                    |
| Klon-Bezeichnung         | [AE-6]                                                                                                                                                                                                                                                        |

|                        |                                                                                                                      |
|------------------------|----------------------------------------------------------------------------------------------------------------------|
| Application Verdünnung | Flow Cytometry: 5ul per test per one million cells (or 5ul per 100ul of whole blood),Immunofluorescence (1:50-1:100) |
|------------------------|----------------------------------------------------------------------------------------------------------------------|
