| Produktbeschreibung      | Intermediate conductance calcium-activated potassium channel protein 1(KCNN4, Kca3.1) is part of a potentially heterotetrameric voltage-independent potassium channel that is activated by intracellular calcium. Activation is followed by membrane hyper... |
| Klonalität               | Polyclonal                                                                                                                                                                                                                                                    |
