| Immunogen                | Human recombinant HSP70 overexpressed in E.coli                                                                                                                                                                                                               |
| Konjugation              | FITC                                                                                                                                                                                                                                                          |
| Produktbeschreibung      | HSP70 genes encode abundant heat-inducible 70-kDa HSPs (HSP70s). In most eukaryotes HSP70 genes exist as part of a multigene family. They are found in most cellular compartments of eukaryotes including nuclei, mitochondria, chloroplasts, the endoplas... |
| Klonalität               | Monoclonal                                                                                                                                                                                                                                                    |
| Klon-Bezeichnung         | [3A3]                                                                                                                                                                                                                                                         |
| NCBI                     | <a href="#">3303</a>                                                                                                                                                                                                                                          |

|                        |                                                                                                       |
