| Artikelname              | Human LRP10 Protein (LRP-HM110)                                                                                                     |
| Artikelnummer            | KAB-LRP-HM110                                                                                                                       |
| Hersteller Artikelnummer | LRP-HM110                                                                                                                           |
| Alternativnummer         | KAB-LRP-HM110-100UG, KAB-LRP-HM110-500UG                                                                                            |
| Hersteller               | KactusBio                                                                                                                           |
| Kategorie                | Proteine/Peptide                                                                                                                    |
| Spezies Reaktivität      | Human                                                                                                                               |
| Produktbeschreibung      | Recombinant Human LRP10 Protein is expressed from HEK293 with His tag at the C-Terminus.It contains His17-Lys440....                |
| Molekulargewicht         | The protein has a predicted MW of 47.14 kDa. Due to glycosylation, the protein migrates to 60-70 kDa based on Bis-Tris PAGE result. |
| Tag                      | C-His                                                                                                                               |
| UniProt                  | <a href="#">Q7Z4F1</a>                                                                                                              |
| Puffer                   | Lyophilized from 0.22µm filtered solution in PBS (pH 7.4). Normally 8% trehalose is added as protectant before lyophilization.      |
| Expression System        | HEK293                                                                                                                              |
| Reinheit                 | > 95% as determined by Bis-Tris PAGE                                                                                                |
| Formulierung             | Lyophilized                                                                                                                         |
| Sequenz                  | His17-Lys440                                                                                                                        |
