Anwendungsbeschreibung	Immunohistochemistry (paraffin sections): Recommended dilution: 5 µg/ml, positive tissue: brain. Western blotting: Recommended dilution: 2 µg/ml, positive control: JURKAT human T cell leukemia cell line. Immunoprecipitation: positive control: J77 T cell line. Preparation of cell lysate: 30 min on ice (orbital incubator) in lysing buffer, lysing buffer with N-dodecyl beta-D-maltoside (20 mM Tris/Cl, 100 mM NaCl pH 8,2, 1% laurylmaltosid (w/v), 50 mM NaF). The antibody FYN-01 apparently gives very specific signal (by 59 kDa), and nicely immunoprecipitates Fyn from cell lysates.
