| Kategorie                | Antikörper                                                                                                                                                                                                                                                    |
| Applikation              | ICC, IHC-P, IP, WB                                                                                                                                                                                                                                            |
| Spezies Reaktivität      | Gallus, Human, Mouse, Porcine, Rat                                                                                                                                                                                                                            |
| Produktbeschreibung      | Vimentin (57 kDa) is the most ubiquitous intermediate filament protein and the first to be expressed during cell differentiation. All primitive cell types express vimentin but in most non-mesenchymal cells it is replaced by other intermediate filamen... |
| Klonalität               | Monoclonal                                                                                                                                                                                                                                                    |
| Konzentration            | 1 mg/ml                                                                                                                                                                                                                                                       |
| Klon-Bezeichnung         | [VI-10]                                                                                                                                                                                                                                                       |
| Isotyp                   | Mouse IgM                                                                                                                                                                                                                                                     |
| Puffer                   | Tris buffered saline (TBS), pH 8.0, 15 mM sodium azide                                                                                                                                                                                                        |
| Lagerung                 | 2°C to 8°C                                                                                                                                                                                                                                                    |
| Target-Kategorie         | Vimentin                                                                                                                                                                                                                                                      |

|                        |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |

| Antibody Type          | Monoclonal Antibody                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |
| Anwendungsbeschreibung | <p>Immunocytochemistry: Staining technique: (a) fix cells for 10 min in methanol at -20C and for 6 min in acetone at -20C, (b) fix cells directly in methanol for 10 min at -20C or in acetone for 10 min at -20C. Positive control: 3T3 murine Swiss albino fibroblast cell line, RBL rat basophilic leukemia cell line. Immunohistochemistry (paraffin sections): Recommended dilution: 5 µg/ml, positive tissue: skin fibroblast. Western blotting: Recommended dilution: 1-2 µg/ml.</p> |
