| Kategorie                | Antikörper                                                                                                                                                                                                                                                    |
| Applikation              | FA, FC, IHC-Fr                                                                                                                                                                                                                                                |
| Spezies Reaktivität      | Bovine, Canine, Equine, Feline, Human, Primate, Sheep                                                                                                                                                                                                         |
| Produktbeschreibung      | CD49d / integrin alpha 4, unlike other alpha integrins, neither contains an I-domain, nor undergoes disulfide-linked cleavage. It associates with beta 7 chain to form alpha 4 / beta 7 integrin, and with beta 1 chain (CD29) to form VLA-4 integrin. The... |
| Klonalität               | Monoclonal                                                                                                                                                                                                                                                    |
| Konzentration            | 1 mg/ml                                                                                                                                                                                                                                                       |
| Klon-Bezeichnung         | [9F10]                                                                                                                                                                                                                                                        |
| Isotyp                   | Mouse IgG1 kappa                                                                                                                                                                                                                                              |
| Puffer                   | Phosphate buffered saline (PBS), pH 7.4                                                                                                                                                                                                                       |
| Lagerung                 | 2°C to 8°C                                                                                                                                                                                                                                                    |
| Target-Kategorie         | CD49d                                                                                                                                                                                                                                                         |

|                        |                                                                                                           |
