| Hersteller               | EXBIO                                                                                                                                                                                                                                                         |
| Kategorie                | Antikörper                                                                                                                                                                                                                                                    |
| Applikation              | FA, FC, IHC-Fr, IP                                                                                                                                                                                                                                            |
| Spezies Reaktivität      | Human, Mouse, Primate, Rabbit                                                                                                                                                                                                                                 |
| Immunogen                | B10 mouse spleen cells enriched for T cells                                                                                                                                                                                                                   |
| Produktbeschreibung      | CD11b (integrin alphaM subunit) is a 165-170 kDa type I transmembrane glycoprotein that non-covalently associates with integrin beta2 subunit (CD18), expression of the CD11b chain on the cell surface requires the presence of the CD18 antigen. CD11b/C... |
| Klonalität               | Monoclonal                                                                                                                                                                                                                                                    |
| Konzentration            | 1 mg/ml                                                                                                                                                                                                                                                       |
| Klon-Bezeichnung         | [M1/70]                                                                                                                                                                                                                                                       |
| Isotyp                   | Rat IgG2b                                                                                                                                                                                                                                                     |
| Puffer                   | Phosphate buffered saline (PBS), pH 7.4                                                                                                                                                                                                                       |
| Lagerung                 | 2°C to 8°C                                                                                                                                                                                                                                                    |

|                        |                                                                                                       |
|------------------------|-------------------------------------------------------------------------------------------------------|
| Target-Kategorie       | CD11b                                                                                                 |
| Antibody Type          | Monoclonal Antibody                                                                                   |
| Anwendungsbeschreibung | Functional application: In vitro blocking of CD11b. Flow cytometry:<br>Recommended dilution: 1 µg/ml. |
