| Immunogen                | Purified human IgM.                                                                                                                                                                                                                                           |
| Konjugation              | APC                                                                                                                                                                                                                                                           |
| Produktbeschreibung      | Immunoglobulin M (IgM) is produced as a 900 kDa pentamer, which is an efficient complement binder. This antibody type is produced initially in the immune response and it is the first immunoglobulin class to be synthesized by a fetus or newborn. IgM a... |
| Klonalität               | Monoclonal                                                                                                                                                                                                                                                    |
| Konzentration            | 0.1 mg/ml                                                                                                                                                                                                                                                     |
| Klon-Bezeichnung         | [CH2]                                                                                                                                                                                                                                                         |
| Isotyp                   | IgG1                                                                                                                                                                                                                                                          |

|                        |                                                                                            |
|------------------------|--------------------------------------------------------------------------------------------|
| Puffer                 | Stabilizing phosphate buffered saline (PBS), pH 7.4, 15 mM sodium azide                    |
| Lagerung               | 2°C to 8°C                                                                                 |
| Antibody Type          | Monoclonal Antibody                                                                        |
| Anwendungsbeschreibung | Flow cytometry: Recommended dilution: 1-4 µg/ml. Extracellular and intracellular staining. |
