| Produktbeschreibung      | CD5 antigen (T1, 67 kDa) is a human cell surface T-lymphocyte single-chain transmembrane glycoprotein. CD5 is expressed on all mature T-lymphocytes, most of thymocytes, subset of B-lymphocytes and on many T-cell leukemias and lymphomas. It is a type ... |
| Klonalität               | Monoclonal                                                                                                                                                                                                                                                    |
| Konzentration            | 0.5 mg/ml                                                                                                                                                                                                                                                     |
| Klon-Bezeichnung         | [53-7.3]                                                                                                                                                                                                                                                      |
| Isotyp                   | Rat IgG2a kappa                                                                                                                                                                                                                                               |

|                        |                                                                         |
|------------------------|-------------------------------------------------------------------------|
| Puffer                 | Stabilizing phosphate buffered saline (PBS), pH 7.4, 15 mM sodium azide |
| Lagerung               | 2°C to 8°C                                                              |
| Target-Kategorie       | CD5                                                                     |
| Antibody Type          | Monoclonal Antibody                                                     |
| Anwendungsbeschreibung | Flow cytometry: Recommended dilution: 1-5 µg/ml.                        |
