| Kategorie                | Antikörper                                                                                                                                                                                                                                                    |
| Applikation              | FC                                                                                                                                                                                                                                                            |
| Spezies Reaktivität      | Canine, Human, Porcine                                                                                                                                                                                                                                        |
| Immunogen                | Raji Burkitts lymphoma cell line                                                                                                                                                                                                                              |
| Konjugation              | Alexa Fluor 700                                                                                                                                                                                                                                               |
| Produktbeschreibung      | CD29 (beta1 integrin subunit, GPIIa) forms non-covalently linked heterodimers with at least 6 different alpha chains (alpha1-alpha6, CD49a-f) determining the binding properties of beta1 (VLA) integrins. These integrins mediate cell adhesion to collag... |
| Klonalität               | Monoclonal                                                                                                                                                                                                                                                    |
| Klon-Bezeichnung         | [MEM-101A]                                                                                                                                                                                                                                                    |
| Isotyp                   | Mouse IgG1                                                                                                                                                                                                                                                    |
| Puffer                   | Stabilizing phosphate buffered saline (PBS), pH 7.4, 15 mM sodium azide                                                                                                                                                                                       |

|                        |                                                                                                                                                                                                                            |
|------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Lagerung               | 2°C to 8°C                                                                                                                                                                                                                 |
| Target-Kategorie       | CD29                                                                                                                                                                                                                       |
| Antibody Type          | Monoclonal Antibody                                                                                                                                                                                                        |
| Application Verdünnung | Flow cytometry: The reagent is designed for analysis of human blood cells using 4 µl reagent / 100 µl of whole blood or 10 <sup>6</sup> cells in a suspension. The content of a vial (0.4 ml) is sufficient for 100 tests. |
