## Product Datasheet

**1 | PEB (4x) | protein extraction buffer 5 x 2 ml (4x stock) allows up to 75 isolations of plant material (using 500 µl 1x PEB for 100 mg fresh weight) or 190 isolations of algal material (using 200 µl 1x PEB for cell amounts co AGR-AS08-300**

|                          |                                                                                                                                                                                                                                                               |
