| Immunogen                  | Hybridoma produced by the fusion of splenocytes from mice immunized with protein preparation from a homogenate of a human mammary tumor and mouse myeloma cells.                                                                                               |
| Conjugation                | Unconjugated                                                                                                                                                                                                                                                   |
| Product Description        | Tenascin is an extracellular matrix glycoprotein which is found in numerous types of tissues, but most predominately in the nervous system. It has been shown to be upregulated at the edge of healing wounds and in the stroma of many tumors. Three types... |
| Clonality                  | Monoclonal                                                                                                                                                                                                                                                     |
| Concentration              | See vial for concentration                                                                                                                                                                                                                                     |

|                   |                                                                                                                                                                                                                                                    |

| UniProt           | <a href="#">P24821</a>                                                                                                                                                                                                                             |
| Buffer            | Provided as solution in phosphate buffered saline with 0.08% sodium azide                                                                                                                                                                          |
| Purity            | Protein A/G Chromatography                                                                                                                                                                                                                         |
| Form              | Unconjugated                                                                                                                                                                                                                                       |
| Formula           | Provided as solution in phosphate buffered saline with 0.08% sodium azide                                                                                                                                                                          |
| Application Notes | Detects human tenascin protein by Western blot at 1-5 µg/ml. Can also be used for immunohistochemistry on frozen and paraffin-embedded tissue sections and for immunoprecipitation. Optimal concentration should be evaluated by serial dilutions. |
