Product Datasheet

Goat anti Human IgA (Fc specific), Clone: [Polyclonal], Monoclonal NMB-GAHU/IGA(FC)

Article Name	Goat anti Human IgA (Fc specific), Clone: [Polyclonal], Monoclonal
Biozol Catalog Number	NMB-GAHU/IGA(FC)
Supplier Catalog Number	GAHu/IgA(Fc)
Alternative Catalog Number	NMB-GAHU/IGA(FC)
Manufacturer	NordicMubio
Host	Goat
Category	Antikörper
Application	IP
Species Reactivity	Human
Product Description	The reactivity of the antiserum is restricted to the Fc part of the IgA molecule. In immunoelectrophoresis and radial immunodiffusion, using various antiserum concentrations against normal human serum a single precipitin line is obtained which shows ...
Clonality	Monoclonal
Clone Designation	[Polyclonal]
Buffer	Delipidated, heat inactivated, lyophilized, stable whole antiserum No preservative added Total protein and IgG concentrations in the antiserum are comparable to those of pooled normal goat serum. No foreign proteins added. Reconstitute the lyophilized ant
Source	Highly purified normal IgA and monoclonal IgA2 isolated from human serum. Freund's complete adjuvant is used in the first step of the immunization procedure.

Application Notes	Precipitation assays. In immunoelectrophoresis use 2 µl serum or equivalent against 120 µl antiserum. In double radial immunodiffusion (Ouchterlony) use a rosette arrangement with 10 µl antiserum in 3 mm diameter center well and 2 µl serum samples (neat and serially diluted in 2 mm diameter peripheral wells).
