| Cross-Adsorption (MinX)    | no cross-adsorbtion                                                                                                                                                                                                                                                       |
| Product Description        | The reactivity of the antiserum is directed to the Fab subunits of intact IgG, IgA IgM and other Ig classes of both light chain types, with their Fab or F(ab) <sub>2</sub> subunits, and with free light chains of kappa and lambda type. In immunoelectrophoresis an... |
| Clonality                  | Monoclonal                                                                                                                                                                                                                                                                |
| Clone Designation          | [Polyclonal]                                                                                                                                                                                                                                                              |

|                   |                                                                                                                                                                                                                                                                |

| Buffer            | FITC-coupled purified hyperimmune goat IgG lyophilized from a solution in phosphate buffered saline (PBS, pH 7.2). No preservative added as it may interfere with the antibody activity. It is reconstituted by adding 1 ml sterile distilled water, spun down |
| Source            | Purified Fab of normal IgG isolated from human serum. Freund's complete adjuvant is used in the first step of the immunization procedure.                                                                                                                      |
| Form              | FITC                                                                                                                                                                                                                                                           |
| Formula           | FITC-coupled purified hyperimmune goat IgG lyophilized from a solution in phosphate buffered saline (PBS, pH 7.2). No preservative added as it may interfere with the antibody activity.                                                                       |
| Antibody Type     | Secondary Antibody                                                                                                                                                                                                                                             |
| Application Notes | ELISA, Immunocytochemistry, Immunohistochemistry (frozen), (In)direct immunofluorescence.                                                                                                                                                                      |
