| Target Specificity         | IgG (F(ab') <sub>2</sub> )                                                                                                                                                                                                                                                |
| Cross-Adsorption (MinX)    | no cross-adsorbtion                                                                                                                                                                                                                                                       |
| Product Description        | The reactivity of the antiserum is directed to the Fab subunits of intact IgG, IgA IgM and other Ig classes of both light chain types, with their Fab or F(ab) <sub>2</sub> subunits, and with free light chains of kappa and lambda type. In immunoelectrophoresis an... |
| Clonality                  | Monoclonal                                                                                                                                                                                                                                                                |
| Clone Designation          | [Polyclonal]                                                                                                                                                                                                                                                              |

|                   |                                                                                                                                                                                                                                                                  |

| Buffer            | Horseradish peroxidase-coupled purified hyperimmune goat IgG lyophilized from a solution in phosphate buffered saline (PBS, pH 7.2). No preservative added, as it may interfere with the antibody activity. It is reconstituted by adding 1 ml sterile distilled |
| Source            | Purified normal Fab of polyclonal IgG isolated from pooled human serum. Freund's complete adjuvant is used in the first step of the immunization procedure.                                                                                                      |
| Form              | HRP                                                                                                                                                                                                                                                              |
| Formula           | Horseradish peroxidase-coupled purified hyperimmune goat IgG lyophilized from a solution in phosphate buffered saline (PBS, pH 7.2). No preservative added, as it may interfere with the antibody activity.                                                      |
| Antibody Type     | Secondary Antibody                                                                                                                                                                                                                                               |
| Application Notes | ELISA, Immunocytochemistry, Immunohistochemistry (paraffin), Dot blot, Immunoblotting.                                                                                                                                                                           |
