| Format                     | IgG                                                                                                                                                                                                                                                           |
| Target Specificity         | IgG+IgM+IgA (Fc)                                                                                                                                                                                                                                              |
| Cross-Adsorption (MinX)    | no cross-adsorbtion                                                                                                                                                                                                                                           |
| Product Description        | The reactivity of the antiserum is directed to the Fc subunits of the major isotypes of the human immunoglobulin system. No reaction is obtained with purified IgG/Fab or any non-Ig protein of human serum, as tested by immunoelectrophoresis and double... |
| Clonality                  | Monoclonal                                                                                                                                                                                                                                                    |
| Clone Designation          | [Polyclonal]                                                                                                                                                                                                                                                  |

|                   |                                                                                                                                                                                                                                                             |
|-------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Buffer            | Peroxidase-coupled purified hyperimmune goat IgG lyophilized from a solution in phosphate buffered saline (PBS, pH 7.2). No preservative added, as it may interfere with the antibody activity. It is reconstituted by adding 1 ml sterile distilled water. |
| Source            | Purified polyclonal human IgG, and IgA and IgM containing factions isolated from human serum. Freunds complete adjuvant is used in the first step of the immunization procedure.                                                                            |
| Form              | HRP                                                                                                                                                                                                                                                         |
| Formula           | Peroxidase-coupled purified hyperimmune goat IgG lyophilized from a solution in phosphate buffered saline (PBS, pH 7.2). No preservative added, as it may interfere with the antibody activity.                                                             |
| Antibody Type     | Secondary Antibody                                                                                                                                                                                                                                          |
| Application Notes | ELISA,Immunocytochemistry,Immunohistochemistry (paraffin),Dot blot,Immunoblotting.                                                                                                                                                                          |
