| Format                     | IgG                                                                                                                                                                                                                                                           |
| Target Specificity         | IgG3 (Fc)                                                                                                                                                                                                                                                     |
| Cross-Adsorption (MinX)    | Human                                                                                                                                                                                                                                                         |
| Product Description        | The reactivity of the antiserum is directed to the subclass IgG3. It does not react with other subclasses of IgG, IgG/Fab fragments, IgM and IgA or any non-Ig protein in mouse serum, as tested by immunoelectrophoresis and double radial immunodiffusio... |
| Clonality                  | Monoclonal                                                                                                                                                                                                                                                    |
| Clone Designation          | [Polyclonal]                                                                                                                                                                                                                                                  |

|                   |                                                                                                                                                                                                                                                                  |
|-------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Buffer            | TRITC-coupled purified hyperimmune goat IgG lyophilized from a solution in phosphate buffered saline (PBS, pH 7.2). No preservative added, as it may interfere with the antibody activity. It is reconstituted by adding 1 ml sterile distilled water, spun down |
| Source            | Pools of purified homogenous IgG3 isolated from pooled mouse serum. Freund's complete adjuvant is used in the first step of the immunization procedure.                                                                                                          |
| Form              | TRITC                                                                                                                                                                                                                                                            |
| Formula           | TRITC-coupled purified hyperimmune goat IgG lyophilized from a solution in phosphate buffered saline (PBS, pH 7.2). No preservative added, as it may interfere with the antibody activity.                                                                       |
| Antibody Type     | Secondary Antibody                                                                                                                                                                                                                                               |
| Application Notes | ELISA, Immunocytochemistry, Immunohistochemistry (frozen), (In)direct immunofluorescence.                                                                                                                                                                        |
