| Target Specificity         | IgG (Fc)                                                                                                                                                                                                                                                      |
| Cross-Adsorption (MinX)    | no cross-adsorbtion                                                                                                                                                                                                                                           |
| Product Description        | The reactivity of the antiserum is restricted to the Fc part of the IgG molecule which expresses strict (class) specificity. In immunoelectrophoresis and radial immunodiffusion using various antiserum concentrations against rabbit serum, a single pre... |

| Buffer            | FITC-coupled purified hyperimmune goat IgG lyophilized from a solution in phosphate buffered saline (PBS, pH 7.2). No preservative added, as it may interfere with the antibody activity. It is reconstituted by adding 1 ml sterile distilled water, spun down |
| Source            | Pools of purified IgG isolated from rabbit serum. Freund's complete adjuvant is used in the first step of the immunization procedure.                                                                                                                           |
| Form              | FITC                                                                                                                                                                                                                                                            |
| Formula           | FITC-coupled purified hyperimmune goat IgG lyophilized from a solution in phosphate buffered saline (PBS, pH 7.2). No preservative added, as it may interfere with the antibody activity.                                                                       |
| Antibody Type     | Secondary Antibody                                                                                                                                                                                                                                              |
| Application Notes | ELISA, Immunocytochemistry, Immunohistochemistry (frozen), (In)direct immunofluorescence.                                                                                                                                                                       |
