| Format                     | IgG                                                                                                                                                                                                                                                           |
| Target Specificity         | IgG2c (Fc)                                                                                                                                                                                                                                                    |
| Cross-Adsorption (MinX)    | no cross-adsorbtion                                                                                                                                                                                                                                           |
| Product Description        | The reactivity of the antiserum is directed to the subclass IgG2c as tested against rat sera and a panel of purified homogenous immunoglobulins. It does not react with other subclasses of IgG, IgG/Fab fragments, IgM and IgA or any non-Ig protein in r... |
| Clonality                  | Monoclonal                                                                                                                                                                                                                                                    |
| Clone Designation          | [Polyclonal]                                                                                                                                                                                                                                                  |

|                   |                                                                                                                                                                                                                                                                 |

| Buffer            | Purified hyperimmune goat IgG lyophilized from a solution in phosphate buffered saline (PBS, pH 7.2). No preservative added, as it may interfere with the antibody activity. It is reconstituted by adding 1 ml sterile distilled water, spun down to remove in |
| Source            | Pools of purified homogenous IgG2c isolated from pooled rat serum. Freund's complete adjuvant is used in the first step of the immunization procedure.                                                                                                          |
| Formula           | Purified hyperimmune goat IgG lyophilized from a solution in phosphate buffered saline (PBS, pH 7.2). No preservative added, as it may interfere with the antibody activity.                                                                                    |
| Antibody Type     | Secondary Antibody                                                                                                                                                                                                                                              |
| Application Notes | Indirect immunofluorescence, ELISA, Dot blot, Immunoblotting.                                                                                                                                                                                                   |
