Goat IgG, conjugated with FITC NMB-GIGG/FITC

Article Name	Goat IgG, conjugated with FITC
Biozol Catalog Number	NMB-GIGG/FITC
Supplier Catalog Number	GlgG/FITC
Alternative Catalog Number	NMB-GIGG/FITC
Manufacturer	NordicMubio
Host	Goat
Category	Antikörper
Conjugation	FITC
Product Description	As an efficient general counterstain for cell and tissue substrates with immunoconjugates with a label contrasting with the greenish-yellow fluorescence of this product. The purpose of counterstaining is to enhance the optical contrast of the immunos...
Buffer	Fluorochrome coupled purified goat IgG in phosphate buffered saline (pH7.2). No preservative added
Form	FITC
Formula	Fluorochrome coupled purified goat IgG in phosphate buffered saline (pH7.2). No preservative added

Application Notes	ELISA,Immunocytochemistry,Immunohistochemistry (frozen),(In)direct immunofluorescence. The conjugate is shipped at ambient temperature and may be stored at +4C, prolonged storage at -20C. Reconstitute the lyophilized antiserum by adding 1 ml sterile distilled water. Spin down to remove insoluble particles, divide into small aliquots, and store frozen at or below -20C. Prior to use an aliquot is thawed at ambient temperature, spun down again, and used to prepare working dilutions by adding sterile PBS pH7.2). Repeated thawing and freezing should be avoided. If a slight precipitation occurs upon storage, this should be removed by centrifugation. It will not affect the performance of the conjugate. Diluted product should be stored at +4C, not refrozen, and preferably used the same day.
