| Format                     | Antiserum                                                                                                                                                                                                                                                     |
| Target Specificity         | IgG2b (Fc)                                                                                                                                                                                                                                                    |
| Cross-Adsorption (MinX)    | no cross-adsorbtion                                                                                                                                                                                                                                           |
| Product Description        | The reactivity of the antiserum is directed to the subclass IgG2b. It does not react with other subclasses of IgG, IgG/Fab fragments, IgM and IgA or any non-Ig protein in mouse serum, as tested by immunoelectrophoresis and double radial immunodiffusi... |
| Clonality                  | Monoclonal                                                                                                                                                                                                                                                    |
| Clone Designation          | [Polyclonal]                                                                                                                                                                                                                                                  |

|                   |                                                                                                                                                                                                                                                                    |
|-------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Buffer            | Delipidated, heat inactivated, lyophilized, stable whole antiserum No preservative added, as it may interfere with the antibody activity<br>Total protein and IgG concentration in the antiserum are comparable to those of pooled normal rabbit serum. No foreign |
| Source            | Pools of purified homogenous IgG2b isolated from mouse serum.<br>Freunds complete adjuvant is used in the first step of the immunization procedure.                                                                                                                |
