| Buffer                     | Unpurified antiserum containing 0.1% sodium azide,                                                                                  |
| Purity                     | Unpurified                                                                                                                          |
| Form                       | Unpurified antiserum containing 0.1% sodium azide,                                                                                  |
| Target                     | FNIP1                                                                                                                               |

|                    |                                                                                                                                                     |
|--------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------|
| Application Dilute | Optimal antibody dilution should be determined by titration, however as a guideline try atWB: 1/1000 - 1/2000. Predicted molecular weight: 131 kDa. |
