| Product Description        | TGF-beta3 (mouse), (recombinant)...                                                                      |
| Molecular Weight           | ~25.5kDa                                                                                                 |
| UniProt                    | <a href="#">P17125</a>                                                                                   |
| Source                     | Produced in E. coli. Non-glycosylated, disulfide-linked homodimer, containing two 112 amino acid chains. |
| Purity                     | 98% (Reducing and Non-reducing SDS-PAGE)                                                                 |
| Form                       | Liquid. In 20% ethanol and 0.12% acetic acid.                                                            |
| Target                     | TGF-beta                                                                                                 |
