| Conjugation                | APC/Cy7                                                                                                                                                                                                                                                       |
| Product Description        | The clone SK1 specifically binds with a 32-34kDa type I transmembrane glycoprotein of human cells commonly known as CD8a. It is a member of immunoglobulin superfamily. The CD8alpha forms either a homodimer (2 alpha chains) or a heterodimer with CD8be... |
| Clonality                  | Monoclonal                                                                                                                                                                                                                                                    |
