| Category                   | Sonstiges                                                                                                                                                                                                                                                     |
| Conjugation                | SA                                                                                                                                                                                                                                                            |
| Concentration              | 5.0 mg/mL antibody per cc agarose                                                                                                                                                                                                                             |
| Buffer                     | 0.1M Tris buffered saline, pH8.2                                                                                                                                                                                                                              |
| Form                       | Suspension of Magnetic Beads                                                                                                                                                                                                                                  |
| Application Dilute         | IP: User Optimized, WB: User Optimized                                                                                                                                                                                                                        |
| Application Notes          | TrueBlot Streptavidin magnetic beads can be used for immunoprecipitation (IP) of antigens (using biotinylated antibodies) from a wide variety of sources and to Co-immunoprecipitate interaction complexes using biotinylated antibodies. Streptavidin magnet |
