| Product Description        | Total RNA was prepared from cell line WM3211. WM3211 is a tumorigenic (VGP) primary melanoma cell line with competence for metastasis. These cells display fibroblastic morphology in culture. This cell line was established from a metastatic site (lymp... |
| Concentration              | 200 ng / µl (by UV absorbance at 260 nm)                                                                                                                                                                                                                      |
| Buffer                     | RNase free water                                                                                                                                                                                                                                              |
| Source                     | Human                                                                                                                                                                                                                                                         |
| Form                       | Liquid                                                                                                                                                                                                                                                        |
| Application Notes          | Purified RNA is suitable for a number of molecular biology applications including but not limited to next generation sequencing and expression library construction, PCR, real-time PCR, microarray analysis, and transfection experiments.                   |
