| Category                   | Molekularbiologie                                                                                                                                                                                                                                             |
| Conjugation                | Unconjugated                                                                                                                                                                                                                                                  |
| Product Description        | DNA was prepared from cell line WM51. WM51 is a metastatic human melanoma cell line that was established from a metastatic tissue site of a male patient. These cells display a mixed morphology and require sub-confluent culture conditions. This cell l... |
| Concentration              | 200 ng / µl (by UV absorbance at 260 nm)                                                                                                                                                                                                                      |
| Buffer                     | 0.01 M Tris Chloride, 0.001 M EDTA, pH 7.6                                                                                                                                                                                                                    |
| Source                     | Human                                                                                                                                                                                                                                                         |
| Form                       | Liquid                                                                                                                                                                                                                                                        |
| Application Notes          | Purified Genomic DNA is suitable for a number of molecular biology applications including but not limited to preparation of genomic libraries, PCR templates, DNA sequencing, DNA fingerprinting, and mutation analysis.                                      |
