| Immunogen                  | B10 Mouse spleen cells enriched for T lymphocytes                                                                                                                                                                                                             |
| Product Description        | CD11b is a cell adhesion molecule that acts as a receptor for cell surface ligands such as intracellular adhesion molecules (ICAMs) or soluble ligands. Integrins are heterodimeric proteins that contain an a chain and b chain. Integrin aM combines wit... |
