| Immunogen                  | Recombinant, full length chicken Catenin gamma protein                                                                                                                                                                                                        |
| Product Description        | It recognizes a protein of 80-87kDa, identified as gamma-catenin. The catenins ((TM), A°a, A and OOL) are ubiquitously expressed, cytoplasmic proteins that associate with E-cadherin at cellular junctions. Catenin/cadherin complexes play an important ... |
| Clonality                  | Monoclonal                                                                                                                                                                                                                                                    |
| Clone Designation          | [15F11]                                                                                                                                                                                                                                                       |
