| Species Reactivity         | Human                                                                                                                                                                                                                                                         |
| Immunogen                  | Recombinant fragment (around aa 2293-2478) of human Ki67 protein (exact sequence is proprietary)                                                                                                                                                              |
| Product Description        | Ki-67 antigen is a nuclear, non-histone protein that is present in all stages of the cell cycle except G0. This characteristic makes Ki-67 an excellent marker for proliferating cells and is commonly used as one of the prognostic factors in cancer stu... |
| Clonality                  | Monoclonal                                                                                                                                                                                                                                                    |
| Clone Designation          | [MKI67/4945R]                                                                                                                                                                                                                                                 |
| Molecular Weight           | 345kDa and 395kDa                                                                                                                                                                                                                                             |
