| Species Reactivity         | Human                                                                                                                                                                                                                                                         |
| Immunogen                  | Recombinant fragment of human KRT20 protein (around aa 196-323)<br>(exact sequence is proprietary)                                                                                                                                                            |
| Product Description        | This MAb recognizes an intermediate filament protein of 46kDa, identified as cytokeratin 20 (KRT20). KRT20 is abundantly expressed in goblet cells and enterocytes of the gastrointestinal tract. It is a useful marker of pancreatic and colorectal cance... |
| Clonality                  | Monoclonal                                                                                                                                                                                                                                                    |
| Clone Designation          | [KRT20/4879R]                                                                                                                                                                                                                                                 |
| Molecular Weight           | 46kDa                                                                                                                                                                                                                                                         |
