| Alternative Catalog Number | NBT-RBM53-7293-P1-100                                                                                                                                                                                                                                         |
| Manufacturer               | NeoBiotechnologies                                                                                                                                                                                                                                            |
| Host                       | Rabbit                                                                                                                                                                                                                                                        |
| Category                   | Antikörper                                                                                                                                                                                                                                                    |
| Application                | IHC                                                                                                                                                                                                                                                           |
| Species Reactivity         | Human                                                                                                                                                                                                                                                         |
| Immunogen                  | Synthetic peptide corresponding to Type II Cytokeratins residues within aa300-400 of Type II Cytokeratins                                                                                                                                                     |
| Product Description        | The keratins are the typical intermediate filament proteins of epithelia, showing an outstanding degree of molecular diversity. Heteropolymeric filaments are formed by pairing of type I and type II molecules. In humans 54 functional keratin genes exi... |
| Clonality                  | Monoclonal                                                                                                                                                                                                                                                    |
| Clone Designation          | [KRTH/4392R]                                                                                                                                                                                                                                                  |
| Molecular Weight           | 66/65/64/57/62/60/51/54kDa                                                                                                                                                                                                                                    |
