Application Notes

DEFA1/3 Peptide is used for blocking the activity of DEFA1/3 antibody (catalog number 42-495). The DEFA1/3 antibody ships at 0.5 mg/mL and the DEFA1/3 Peptide ships as a 100 µg pellet. When peptide is reconstituted in 200 µL water, the concentration will be 0.5 mg/mL, identical to that of the antibody. The best starting ratio would be 1:1 (which means molar excess of peptide relative to antibody when identical volumes are mixed). Mix equal volume of peptide and antibody at the required dilution and leave at ambient temperature for 20 minutes. Then incubate and develop in parallel two blots: one with the antibody and one with the antibody which has been pre-absorbed with the provided peptide.
