| Product Description        | Mouse Growth Differentiation Factor 11 (GDF11) CLIA Kit for detecting GDF11 in serum, plasma, tissue homogenates, cell lysates, cell culture supernates, other biological fluids. Species Reactivity: Mouse (Mus musculus). Detection Range: 1.37-1,000pg/... |
| Range                      | 1.37-1,000pg/ml                                                                                                                                                                                                                                               |
| Sensitivity                | 0.55pg/ml                                                                                                                                                                                                                                                     |
| NCBI                       | <a href="#">14561</a>                                                                                                                                                                                                                                         |
| Form                       | 96-Well Plate                                                                                                                                                                                                                                                 |
| Samples                    | Serum, Plasma, Tissue Homogenates, Cell Lysates, Cell Culture Supernates, Other Biological Fluids                                                                                                                                                             |
| Target                     | Growth Differentiation Factor 11 (GDF11)                                                                                                                                                                                                                      |
