| Product Description        | Recombinant <i>Saccharomyces cerevisiae</i> Lanosterol 14-alpha demethylase (ERG11), partial is a purified Recombinant Protein. Purity: >90% as determined by SDS-PAGE. Host: <i>E. coli</i> . Endotoxin Level: Not Tested. Species: <i>Saccharomyces cerevisiae</i> (strain ATC... |
| Molecular Weight           | 29.1kDa                                                                                                                                                                                                                                                                             |
| Tag                        | N-Terminal Gst-Tagged                                                                                                                                                                                                                                                               |
| Buffer                     | If the delivery form is liquid, the default storage buffer is Tris/PBS-based buffer, 5%-50% glycerol. If the delivery form is lyophilized powder, the buffer before lyophilization is Tris/PBS-based buffer, 6% Trehalose, pH 8.0.                                                  |
| Purity                     | >90% by SDS-PAGE                                                                                                                                                                                                                                                                    |
