| Product Description        | Recombinant Human Galactose-1-phosphate uridylyltransferase (GALT) is a purified Recombinant Protein. Purity: >90% as determined by SDS-PAGE. Host: E. coli. Endotoxin Level: Not Tested. Species: Human (Homo sapiens). Target Name: GALT. Target Synonym... |
| Molecular Weight           | 59.4kDa                                                                                                                                                                                                                                                       |
| Tag                        | N-Terminal 6Xhis-Sumo-Tagged                                                                                                                                                                                                                                  |
| Buffer                     | If the delivery form is liquid, the default storage buffer is Tris/PBS-based buffer, 5%-50% glycerol. If the delivery form is lyophilized powder, the buffer before lyophilization is Tris/PBS-based buffer, 6% Trehalose, pH 8.0.                            |

|          |                                                                                                                                                                                                                                                                                |
