| Product Description        | The Protein MultiColor Marker, low M.W. range consists of seven prestained protein standards, Blue, Red, Green and Purple, ranging in appropriate molecular weight from 2 kDa to 46 kDa. The marker is suitable for monitoring gel electrophoresis and ele... |
| Buffer                     | In 50 mM Tris-HCl, EDTA, glycerol, SDS, urea, pH 6.8.                                                                                                                                                                                                         |
| Form                       | Liquid                                                                                                                                                                                                                                                        |
| Application Dilute         | Electrophoresis (5 uL/lane).                                                                                                                                                                                                                                  |
