| Immunogen                  | Recombinant full-length human CD8a protein                                                                                                                                                                                                                    |
| Product Description        | CD8 is a cell surface receptor expressed either as a heterodimer with the CD8 beta chain (CD8 alpha/beta) or as a homodimer (CD8 alpha/alpha). A majority of thymocytes and a subpopulation of mature T cells and NK cells express CD8a. CD8 binds to MHC ... |
| Concentration              | 1 mg/mL                                                                                                                                                                                                                                                       |
| Molecular Weight           | 32 kDa                                                                                                                                                                                                                                                        |
