| Product Description        | The SARS-CoV-2 spike is presented as a trimeric structure on the surface of the virus. It consists of three identical transmembrane proteins, called spike proteins, each containing two subunits: the S1 and the S2 subunit. The S1 is necessary for the ... |
| Molecular Weight           | 141 kDa per monomer                                                                                                                                                                                                                                           |
