| Immunogen                  | The antiserum was produced against synthesized peptide derived from human AurB around the phosphorylation site of Tyr12. AA range:1-50                                                                                                                        |
| Product Description        | This gene encodes a member of the aurora kinase subfamily of serine/threonine kinases. The genes encoding the other two members of this subfamily are located on chromosomes 19 and 20. These kinases participate in the regulation of alignment and segre... |
| Clonality                  | Polyclonal                                                                                                                                                                                                                                                    |
