| Immunogen                  | The antiserum was produced against synthesized peptide derived from human PKC delta around the phosphorylation site of Ser645. AA range:612-661                                                                                                               |
| Product Description        | Protein kinase C (PKC) is a family of serine- and threonine-specific protein kinases that can be activated by calcium and the second messenger diacylglycerol. PKC family members phosphorylate a wide variety of protein targets and are known to be invo... |
