| Immunogen                  | Synthesized phosho peptide around human SATB1 (Ser47)                                                                                                                                                                                                         |
| Product Description        | This gene encodes a matrix protein which binds nuclear matrix and scaffold-associating DNAs through a unique nuclear architecture. The protein recruits chromatin-remodeling factors in order to regulate chromatin structure and gene expression. [provid... |
| Clonality                  | Polyclonal                                                                                                                                                                                                                                                    |
