| Species Reactivity         | Guinea pig                                                                                                                                                                                                                                                    |
| Conjugation                | FITC                                                                                                                                                                                                                                                          |
| Product Description        | Assay Biotechnology secondary antibodies are available conjugated to enzyme, biotin or fluorophore for use in a variety of antibody-based applications including Western Blot, ImmunoHistoChemistry, ImmunoFluorescence, Flow Cytometry and ELISA. We offe... |
| Source                     | Polyclonal, Rabbit IgG                                                                                                                                                                                                                                        |
| Purity                     | The antibody was isolated from ascitic by immunoaffinity chromatography using antigens coupled to agarose beads.                                                                                                                                              |
| Form                       | Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide.                                                                                                                                                                                       |

|                    |                                                                                                                                                               |
|--------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Application Dilute | Optimal working dilutions should be determined experimentally by the investigator. Suggested starting dilutions are IF (1:250 - 1:2000), FCM (1:250 - 1:2000) |
