| Immunogen                  | Synthesized peptide derived from human FLI1 AA range: 300-400                                                                                                                                                                                                 |
| Product Description        | This gene encodes a transcription factor containing an ETS DNA-binding domain. The gene can undergo a t(11,22)(q24,q12) translocation with the Ewing sarcoma gene on chromosome 22, which results in a fusion gene that is present in the majority of Ewin... |
| Clonality                  | Monoclonal                                                                                                                                                                                                                                                    |
