| Species Reactivity         | Human                                                                                                                                                                                                                                               |
| Product Description        | Human Deoxypyridinoline ELISA Kit is a competitive Enzyme-Linked Immunosorbent Assay (cELISA) designed for the in vitro quantitative determination of human Deoxypyridinoline in serum, plasma, tissue homogenates, and other biological fluids.... |
| Range                      | 0.156-10 ng/ml                                                                                                                                                                                                                                      |
| Sensitivity                | 0.094 ng/ml                                                                                                                                                                                                                                         |
| Samples                    | Serum, plasma, tissue homogenates, and other biological fluids.                                                                                                                                                                                     |
| Target                     | Deoxypyridinoline                                                                                                                                                                                                                                   |
